

Customer Notes

Feb. 4th, 2025

- Wrong track
- Get a better general sense of project problem
- See where we went too far
- Don't look towards donations and volunteering, but instead on fundraising
- Keep the other things we have, rid of Legacy Funding and such
- Leaning towards a separate website rather than one connected directly to the website
- Look more towards where we could go on the things we already know instead of branching out too much
- Get rid of a login/signup
- Store things in a desired part of the main menu, rather than having some of them up on the header
- We decide how we want to do things design-wise, we worry about how it looks, like a carousel and such
