

Customer Notes – Activity 3

- Branding guidelines, work towards looking more at what we could do based on the guidelines that you have provided
- Make it more related to Saskatchewan, so people know what exactly it's for and where it's for, how they can help
- With this, I added links to resource hubs in Saskatchewan like the Saskatchewan Chamber of Commerce and the Regina and District Chamber of Commerce, as well as adding the legislative building as a photo used
- Dial back on more images and add more important images, images that relate to our website and who we really are, define ourselves more
- I got rid of a lot of the images we had before and just made it more text-heavy so that there isn't as much distractions and it is straight to the point
- Get rid of some of the buckets and combine some of them
- I got rid of a lot of the buckets they had put before, and I had merged some of them to work together, I made sure to condense the website as much as possible
- I also made the home page clearer and explanatory
- Make the call to actions 3 buttons that lead to the most important parts/links of our website
- I did just that, making it forward and visible, as much as possible, I tried to cut back on information that you already had on the actual SSCF website
